4 WAY TEST

Is it the truth?
 Is it fair to all concerned?
 Will it build goodwill and better
 friendships?
 Will it be beneficial to all concerned?

Blast from the past!

Scientists from the RAND Corporation have created this model to illustrate how a "home computer" could look like in the year 2004. However the needed technology will not be economically feasible for the average home. Also the scientists readily admit that the computer will require not yet invented technology to actually work, but 50 years from now scientific progress is expected to solve these problems. With teletype interface and the Fortran language, the computer will be easy to use.

TENTATIVE GSE TEAM SCHEDULE
